DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, Species of Figures 9-13, 18 and 28, claims 1-12 in Paper No. 7 is acknowledged.

Claims 13-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Invention and Species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yatagai et al. 3,958,701 in view of Webb 4,909,378.

Yatagai '701 discloses a device for carrying article into and from container, the device comprising a stage 8 positioning close to one end opening of a container 39 placed at a specific location and has a floor surface with a height approximately equal to a height of a floor surface of the container, a stage side displacement means 10/13/26 capable of lifting up and down a pallet loaded with article to the floor surface of the stage and supporting the pallet, an external force application means 25 that causes the pallet to move horizontally by the stage-side displacement means toward the container wherein the stage side displacement is a lifting/sliding device including an expanding member 26

that is capable of pushing up the sliding member 13 by expanding itself when air is introduced and a sliding member has multiple rollers arranged in parallel to each other. Yatagai does not disclose a container-side displacement means and an external force means.

Webb '379 discloses a device for carrying article into and from container having a container side displacement means and an external force means for moving a loaded pallet from the container side to a stage.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have utilized a container-side displacement means and an external force means for the container of Yatagai as disclosed by Webb in order to provide better and quicker pallet handling system.

Allowable Subject Matter

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the cited references separately discloses a device for carrying article into and from a container.
